

Ahmad Faisal bani Hamad

Software Engineer

+962798692428 | ahmad100.fa100@gmail.com | github.com/ahmadfa100 | linkedin.com/in/ahmad-faisal-dev/

Summary

Junior Software Engineer specializing in full-stack development and cloud computing (AWS, Azure). Combines strong problem-solving capabilities with deep technical expertise in Machine Learning, Deep Learning, and LLM technologies. Highly skilled in managing robust data pipelines-extracting and cleaning complex datasets-and building predictive ML models using advanced Python libraries to seamlessly bridge modern web architectures with AI systems

Education

Jordan University of Science and Technology (JUST)

Bachelor of Software Engineering

2025

GPA:3.33

Licenses & certifications

- | | |
|---|---------------------|
| 1- AWS Certified Cloud Practitioner, Amazon Web services (AWS) | Feb 2026 - Feb 2029 |
| 2- Fundamentals of Deep Learning, Nvidia | 2026 |
| 3- Data Science and Artificial intelligence, College of Central England, Pioneers | 2026 |

Experience

Full Stack ASP.NET Developer Bootcamp , Qualify You

Sep 2025 – Jan 2026

- Participated from the earliest stages of system design and development of a real-time, interactive web application using ASP.NET Web API and React.js.
- Contributed to backend architecture, API design, and seamless frontend-backend integration.
- Implemented real-time features and ensured application scalability and responsiveness.

Led the development team during the final phase, coordinated task delivery, and ensured successful project completion.

Web Development Trainee, Clever Mind POB

Jun 2024 – Sep 2024

- Developed and implemented multiple web projects, strengthening proficiency in HTML, CSS, and JavaScript.
- Modified and optimized 3+ existing projects, reinforcing university-taught concepts in real-world scenarios.
- Analyzed official documentation and technical specifications to implement features accurately.
- Built a complete web project from scratch, covering planning, design, development, and deployment.

CCNA Level 1 Trainee, CTS – Volunteer

Jul 2022 – Oct 2022

- Completed intensive, face-to-face CCNA Level 1 training with hands-on labs covering OSI/TCP-IP, IP addressing, subnetting, VLANs, switching, and basic routing.
- Configured and managed Cisco network devices and performed server-related tasks including OS installation and DHCP/DNS setup.

Selected projects

Green Bridge | Frontend: React, HTML, CSS, JavaScript; Backend: Node.js (Express, WebSockets, RESTful APIs), PostgreSQL,Postman.

- Implemented LDA and LSTM models for topic classification, achieving 46% and 42% accuracy on large-scale datasets.
- Optimized preprocessing and model hyperparameters to improve coherence score by 20% on smaller datasets.

Deep Learning Projects (CNN, RNN, LSTM, GRU) | Python, NumPy, Pandas, Matplotlib, scikit-learn, TensorFlowumpy

- Prepared and cleaned datasets using NumPy, Matplotlib and Pandas, handling missing values, inconsistencies, and data formatting issues.
- Built a CNN model for image classification using a flower dataset, focusing on model accuracy and practical deployment readiness.
- Developed RNN-based models, including SimpleRNN, LSTM, and GRU, for time-series/sequential data prediction and analysis.
- Evaluated model performance using accuracy, loss, and validation metrics to improve results and reduce overfitting.

Lightsek | Frontend: React, HTML, CSS, JavaScript, Backend: ASP.NET Web API (Clean Architecture),PostgreSQL

- Developed a full-stack social media platform with a Next.js frontend, MongoDB database, and Clerk authentication, implementing modular React components and REST API integrations for scalable feature development.
- Implemented OAuth 2.0, WebSockets, search engine queries, activity feed, and had a growing community of 50+ users.

Bus-Ticket system | Frontend: JSP (JavaServer Pages) HTML, CSS; Backend: Java Servlets (MVC architecture, DAO & design patterns) on Apache Tomcat; Database: PostgreSQL;

- comprehensive bus ticketing platform supporting multiple user roles and discount schemes, featuring an admin dashboard for ticket creation, editing, deletion, fare calculation, booking and viewing past trips.

Skills

- **Languages:** Python, C#, C++, Java, JavaScript, TypeScript, PHP, SQL, Bash
- **Technologies:** Asp.Net core, EJS, React.js, Node.js, N8N Automation , MongoDB, SQL Server, Postgres, NumPy, Pandas, Linux, Git, Docker, Jupyter, Google Colab, Figma
- **Cloud & Devops:** AWS, Azure
- **Concepts:** Software Engineering, Frontend, Backend, Cloud Computing, Data Analysis, Data Science, Machine Learning, Deep Learning
- **Languages:** Arabic: Native, English: very good

Completed courses

• Python for Data Science and Machine Learning Bootcamp, Udemy	25 hours	2026
• Fundamentals of Azure, Microsoft Learning	24 hours	2026
• ASP.NET Core (MVC) Development, The Hope International Edu	40 hours	2025
• Full-Stack Web Development (MERN), Udemy	61 hours	2025
• CCNA: introduction to Network, Cisco	14 hours	2025
• Coach you, Ministry of Digital Economy & Entrepreneurship.	6 months	2025
